JOBS INSIDE:

Men must stop abuse

President Cyril Ramaphosa has read the riot act to abusive South African men, who harm women and children, saying the brutal attacks must come to an end.

Gender-based violence (GBV) has increased in the country amid the coronavirus (COVID-19) pandemic, which is affecting large parts of the world. This, the President said, means the country is waging a war on two pandemics.

Addressing South Africans recently, President Ramaphosa expressed deep-felt regret at the recent wave of fatal attacks on women of all ages.

"As a man, as a husband and as a father, I am appalled at what is no less than a war being waged against the women and children of our country. At a time when the pandemic has left us all feeling vulnerable and uncertain, violence is being unleashed on women and children with a brutality that defies comprehension."

"These rapists and killers walk among us. They are in our communities."

The perpetrators, the President said, are fathers, brothers, sons and friends. "[These are] violent men with utterly no regard for the sanctity of human life."

21 women and children murdered

Over the past few weeks, 21 women and children have been murdered.

"Their killers thought they could silence them but we will not forget them, and we will speak for them where they cannot," the President said, calling the victims by name.

They include Tshegofatso Pule, Naledi Phangindawo, Nompumelelo Tshaka, Nomfazi Gabada, Nwabisa Mgwandela, Altecia Kortjie and Lindelwa Peni - all young women who were killed by men.

"We will speak for the 89-year-old grandmother, who was
